

JAGUAR III

Wednesday, 11 July 2007

Description

-

Intelligent Unroll Media Page Command

Cut long plots or multiple copies without babysitting. Jaguar III intuitively releases a roll of heavy and wide vinyl using the Unroll Media function or automatically starts a new plot with a specified top margin using the Page Command function.

-

Efficient Throughput

At up to 60 inches per second cutting speed, Jaguar III's cutting rate simply outperforms the competition. This cutting curves or straight lines!

-

Innovative Tangential Emulation Mode

The Jaguar III cutting plotter smoothly cuts small lettering or intricate graphics, its innovative tangential emulation mode yields clean corners on thick material.

-

USB Connectivity

The Jaguar III support tri-port connectivity with serial, parallel, and USB interactive ports. Tri-ports connectivity offers great flexibility for sign makers.

-

Enhanced Accu-Aligning System

JAGUAR III series feature a standard Accu-Aligning System (ASS) to guarantee precise contour cutting by detecting the registration marks on digitally produced images.

-

User Friendly Control Panel

The single-to-use and Multi-Language control panel instinctively anticipates any move. LCD prompting comes in 8 languages. Just choose your native language and enter a comfortable working environment!

-

Selective Pinch Roller Positioning

Each Pinch roller can be operated individually and selectively, widening the Jaguar III cutting plotter's range of applications. Cut both the most delicate of films or the thickest of materials up to 1.2mm.
